# Did you know?

That the Great Seal was first used on the back of the \$1 bill in 1935?

That Paul Revere is credited with engraving the plates used to print the first paper money in the U.S.?

That before paper money was used, Americans used buckskins for money? This is where we get the term "bucks."

That there are 4 automobiles and 11 light posts on the back of the "old" \$10 bill?

That if you used a magnifying glass, you can see Abraham Lincoln sitting at the Lincoln Memorial on the back of a penny?

That \$500, \$1000, and \$10,000 bills have not been printed since 1946?

That Fort Knox in Kentucky, has been the place where the U.S. stores its gold since 1938? It is a bomb-proof building. The gold is stored in concrete and steel vaults and is protected by guards with machine guns.

That money is transported to and from the Federal Reserve Banks by armored car? The vehicle is covered with steel plates and is bullet proof.

That money doesn't grow on trees?
